

system

```
graph LR; subgraph system; model; controller; end; system --- my_utils;
```

The diagram illustrates a software architecture. A large light green rectangle represents the 'system'. Inside this rectangle, at the top left, is a smaller green rectangle labeled 'model'. Below and to the right of the 'model' is another green rectangle labeled 'controller'. To the right of the 'system' rectangle, outside of it, is a green rectangle labeled 'my_utils'. A horizontal blue line connects the right side of the 'system' rectangle to the left side of the 'my_utils' rectangle.
